

VALUE MAX RANGE

Cost-effective, high quality feed options designed to meet the requirements of cows at different times of the year.

All-round blend

Value Max Special

Value Max Special can be used at any time throughout the year when feed supplies are low. Closely matching the nutrition of pasture, this feed may also help to reduce the FEI effect, compared with feeding PKE alone.

Pre-calve

Value Max Pre-Calve

Value Max Pre-Calve is designed to be fed only over the period three weeks prior to calving. This feed contains a special mix of high quality minerals specifically targeting cow health over this critical period. This feed will also set up cows to transition onto high energy feed post-calving.

Calving to mating

Value Max Peak

Value Max Peak is specifically designed to meet cow energy requirements over the calving to mating period. Containing high levels of starch, this feed will assist to maintain cow health over the calving period, and help ensure cows are gaining weight leading up to mating. This feed is also available with a full range of minerals to help prevent metabolic disease.

Dry conditions

Value Max Dry

Value Max Dry is designed to assist in meeting cow feed requirements during dry conditions. This feed contains significant levels of high quality protein to assist in maintaining lactation over dry periods, or when feed protein levels are low.

	DM	Protein	Starch	Fat	NDF	MJME
Value Max Special	90	18.5	5.5	4.5	46	12.6
Value Max Pre-Calve	89	12.8	24.0	4.2	36.4	12.0
Value Max Peak	89	13.7	25.7	4.6	39	12.9
Value Max Dry	90	25.5	7.7	4.5	38	12.5
